

Patient Login

Stay Connected

Provide cloud-based patient convenience with anytime access to appointment and account information, online bill pay and treatment images directly from your practice website.

Allow patients to review and pay their bills online.¹ Patient Login™ allows your patients to safely and quickly review and print their account records without calling the office for paper copies. Most significantly, you can enhance patient convenience and reduce account receivables with online bill pay. In a recent survey, 32% of online payments were made within 24 hours of receiving a past due email reminder and 50% of online payments were made within 48 hours.²

Let patients manage their communications. Accommodate your patients by letting them decide what types of communications they receive from you—email, text message and/or telephone.

Help your patients simplify sharing. Sesame Patient Engagement allows your patients to share their Invisalign ClinCheck® with friends and family via email and Facebook, showing potential new patients how easy it is to improve their smile.

The best review of your practice is a patient referral. Sesame Patient Login makes it easy. With a click, patients can write a review of your practice. You decide which reviews to publish on your website and submit to online rating sites. Plus, your patients can quickly refer you to friends or family with a click of a mouse.

97% of dental patients surveyed would rather click than call the practice for information.²

Features

Appointments

- View online
